DETAILED ACTION

Election/Restrictions

This application is a 371 of PCT/FR03/01851 filed on 4/13/2005.

The preliminary amendment filed on December 15, 2004 amending claims 6, 8-12-15, 17, 20-21, 25 and 30-31 has been entered.

Claims 1-31 are pending.

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group, I claim(s) 1-7, 13, 15, 16, 17-20, drawn to an isolated polynucleotide, expression vectors, host cells and method of producing polypeptide.

Group, II claim(s) 10-12, drawn to an isolated polypeptide.

Group, III claim(s) 14, 22-25 and 31, drawn to a method of use of the polypeptide to produce cyclodipeptides or diketopiperazine derivatives in vitro.

Art Unit: 1652

Group, IV claim(s) 8 and 9, drawn to a method of use of the polynucleotide to detect nucleic acid

sequences.

Group, V claim(s) 21, 26, 27, 28, 29, 30, drawn to a method of use of the polypeptide to produce

cyclodipeptides or diketopiperazine derivatives in vivo.

For each inventions I-IV above, restriction to one of the following is also required under

35 U.S.C. 121 and 372. Therefore, election is required of one of inventions I-V and one of

inventions (A) - (D).

(A). protein of SEQ ID NO: 7 or a nucleic acid encoding SEQ ID NO: 7.

(B). protein of SEQ ID NO: 8 or a nucleic acid encoding SEQ ID NO: 8.

(C). protein of SEQ ID NO: 9 or a nucleic acid encoding SEQ ID NO: 9.

(D), protein of SEQ ID NO: 10 or a nucleic acid encoding SEQ ID NO: 10.

2. The inventions listed as Groups I - V do not relate to a single general inventive concept

under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special

technical features for the following reasons: The polynucleotide encoding a polypeptide of

Group I, polypeptide of Group II, method of use of the polypeptide to produce cyclodipeptides or

diketopiperazine derivatives in vitro of Group III, method of use of the polynucleotide to detect

nucleic acid sequences of Group IV and method of use of the polypeptide to produce

cyclodipeptides or diketopiperazine derivatives in vivo of Group V are each unrelated and

distinct. The only shared technical feature of these groups is that they all relate to polynucleotide

encoding a polypeptide, which produce cyclodipeptides or diketopiperazine derivatives.

However, this shared technical feature is not a "special technical feature" as defined by PCT

Application/Control Number: 10/518,019

Art Unit: 1652

Rule 13.2 as it does not define a contribution over the art. Lautru et al. (GenBank Accession No. AY129235, "The albonoursin biosynthetic gene cluster of Streptomyces noursei: a specific mechanism for the formation of didehydro-diketopiperazine metabolites independent of non-ribosomal peptide synthetases", submitted 7/5/2002) teach a polynucleotide encoding three polypeptides similar to the instant application. Thus, a DNA encoding the polypeptides does not make contribution over the prior art.

3. The methods of Groups III - V do not have unity of invention with each other as each methods comprises unrelated steps, use different products and produce different effects.

37 CFR 1.475 does not provide for multiple products and/or methods within a single application. Therefore, inventions of Group I – V lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection

Application/Control Number: 10/518,019

Art Unit: 1652

are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai, In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Iqbal Chowdhury whose telephone number is 571-272-8137. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy can be reached on 703-272-0928. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Respectfully,

Iqbal Chowdhury, PhD Patent Examiner Art Unit 1652 (Recombinant Enzymes) US Patent and Trademark Office Remsen Bldg., Rm. 2B69, Mail Box. 2C70 Ph. (571)-272-8137 Fax. (571)-273-8137
